

## Rushcliffe Developments – Aspect 26

Direct | Inform | Display

Entrance Monolith

Aspect 26, a newly built business park near to Nottingham, offers high specification office accommodation within a secure, landscaped environment. Conveniently sited just off Junction 26 of the M1, Aspect 26 is ideally located within a well established commercial area.

Caliba were asked by their existing client, Rushcliffe Developments, to carry out a Wayfinding Survey to ensure the most effective solution would be provided.

Following consultation with the Local Authority and working closely with the resident Graphic Designer, Caliba prepared a comprehensive signing scheme for both internal and external areas and submitted the necessary planning application.

A powder coated, formed aluminium monolith with applied digital graphics serves as the ideal welcome 'beacon' and this same look and elegance has been utilised throughout the project.

The customised, bow fronted internal signs incorporate perforated mesh to discretely reinforce the stylish, contemporary feel of the office suite whilst providing a clear Wayfinding solution to visitors and staff alike.
