

Redcar & Cleveland College – New Campus

Wall Mounted Sign

After years of planning, Redcar & Cleveland College re-located to their new state-of-the-art campus on Redcar's Corporation Road in September 2008.

Following a successful tendering process, Caliba were tasked with providing both external and internal signing for this exciting £26m project.

Close collaboration with the architects and contractors enabled Caliba to work to tight and carefully planned deadlines during the five month contract period. Constant communication ensured all installations were completed within the five day installation slot provided.

Tailor-made to suit specific requirements, the signage provided helped to maximise awareness both inside and out.

The end result was contemporary styled entrance Monoliths, external signs for the main entrance as well as reception signs, suspended signs and vision signs incorporating Braille and Tactile signage complying with the DDA.

Entrance Monolith
