

## Attenborough Nature Reserve – Nottingham Wildlife Trust

Entrance Sign

Caliba’s relationship with the Nottingham Wildlife Trust, just one of the Wildlife Trusts Caliba works with, extends to being one of their Green Guardian Partners. When Nottinghamshire Wildlife Trust commissioned the build of a flagship redevelopment site at Attenborough, Caliba were called into supply interpretation signage, poster and information signage and structures as well as entrance demarcation.

The result is a series of stylized lecterns with satin polycarbonate graphics, large timber structures with blackboards for wildlife “sightings” and poster display plus large entrance totems with unique full colour graphic panels.

All panels utilise the high resolution UV resist 1440dpi graphics , which offer , through lamination, terrific colour stability and resistance to graffiti in difficult environments.

Interpretation Lectern

Information Board
